Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

CFD-Based Three-Dimensional Turbofan Exhaust Nozzle Analysis System **B93-118**
Commercial Turbofan Engine Exhaust Nozzle Flow Analyses **B93-060**
Numerical Analysis of Reacting Flows Using Finite Rate Chemistry Models **B93-016**
Thrust Vectoring: Theory, Laboratory, and Flight Tests **B93-007**

Aeroelasticity and Aeroservoelasticity

Airfoil Wake and Linear Theory Gust Response Including Sub- and Superresonant Flow Conditions **B93-119**
Supersonic Turbomachine Rotor Flutter Control by Aerodynamic Detuning **B93-079**
New Two-Grid Acceleration Method for Unsteady Navier-Stokes Calculations **B93-040**

Aerospace Plane

Conceptional Study of Separated Core Ultrahigh Bypass Engine **B93-121**
Issues Associated with Long-Duration High-Enthalpy Scramjet Combustor Testing **B93-068**
Experimental Supersonic Hydrogen Combustion Employing Staged Injection Behind a Rearward-Facing Step **B93-067**
Relative Sliding Durability of Two Candidate High-Temperature Oxide Fiber Seal Materials **B93-044**

Flight Control Integration

Thrust Vectoring: Theory, Laboratory, and Flight Tests **B93-007**

Flight Operations

Thrust Vectoring: Theory, Laboratory, and Flight Tests **B93-007**

Fuels and Fuel Systems

Influences on the Sprays Formed by High-Shear Fuel Nozzle/Swirler Assemblies **B93-003**
Static Tests of Jet Fuel Thermal And Oxidative Stability **B93-001**

Noise

Design Verification of Ground Run-up Noise Suppressors for Afterburning Engines **B93-087**

Performance

Computational Analysis of Vented Supersonic Exhaust Nozzles Using a Multiblock/Multizone Strategy **B93-117**

Powerplant Integration

Wake Ingestion Propulsion Benefit **B93-010**

Propeller and Rotor Systems

Efficient Hybrid Scheme for the Analysis of Counter-Rotating Propellers **B93-054**
Modal Simulation of Gear Box Vibration with Experimental Correlation **B93-043**

Rotorcraft

Modal Simulation of Gear Box Vibration with Experimental Correlation **B93-043**

Simulation

Approach to Modeling Continuous Turbine Engine Operation from Startup to Shutdown **B93-066**

STOL/VTOL/STOVL

Conceptional Study of Separated Core Ultra High Bypass Engine **B93-121**

Testing, Flight and Ground

Design Verification of Ground Run-up Noise Suppressors for Afterburning Engines **B93-087**

Vibration

Modal Simulation of Gear Box Vibration with Experimental Correlation **B93-043**

Energy

Hydrogen and Unique Fuels

Metal Atoms Trapped in Cryogenic Matrices as Potential Rocket Fuels **B93-100**

Magnetohydrodynamic Power Generation

Investigation of Secondary Flows in Magnetohydrodynamic Channels **B93-124**
Effects of External Control Circuit on Coal-Fired Supersonic Diagonal-Type MHD Generator **B93-105**
Analysis and Design of an Ultrahigh Temperature Hydrogen-Fueled MHD Generator **B93-104**
Ultrahigh Temperature Vapor-Core Reactor–Magnetohydrodynamic System for Space Nuclear Electric Power **B93-013**

Photovoltaic Power

Radiation-Enhanced Dissociation of Hydrogen in Nuclear Rockets **B93-031**
Ultrahigh Temperature Vapor-Core Reactor–Magnetohydrodynamic System for Space Nuclear Electric Power **B93-013**
Photovoltaic Receivers for Laser Beamed Power in Space **B93-014**

Power Conditioning

Simulating a 1-kW Arcjet Thruster Using a Nonlinear Active Load **B93-053**

Rotating Machinery

Multigrid Calculation of Three-Dimensional Viscous Cascade Flows **B93-084**
Rotating Stall Performance and Recoverability of a High-Speed 10-Stage Axial Flow Compressor **B93-041**
Quasi-Three-Dimensional Nonreflecting Boundary Conditions for Euler Equations Calculations **B93-039**
Advanced Direct-Design Procedure for Centrifugal Impellers **B93-009**

Fluid Dynamics

Boundary Layers and Heat Transfer—Turbulent

Erosive Burning in Solid Propellant Motors **B93-113**
Modeling Supersonic Inlet Boundary-Layer Bleed Roughness **B93-086**

Computational Fluid Dynamics

Full Navier-Stokes Analysis of an Axisymmetric Scramjet Inlet **B93-116**
Effects of Side-Inlet Angle in a Three-Dimensional Side-Dump Combustor **B93-096**
Unified Navier-Stokes Flowfield and Performance Analysis of Liquid Rocket Engines **B93-095**
Modeling Supersonic Inlet Boundary-Layer Bleed Roughness **B93-086**
Inviscid Finite-Volume Lambda Formulation **B93-083**
Prediction of Turbulent Coaxial Streams of Constant and Variable Density **B93-082**
Time-Marching Method for the Prediction of Two-Dimensional, Unsteady Flows of Condensing Steam **B93-081**
Convenient Method to Convert Two-Dimemsional CFD Codes into Axisymmetric Ones **B93-070**
Commercial Turbofan Engine Exhaust Nozzle Flow Analyses **B93-060**
Using a Full Potential Solver for Propulsion System Exhaust Simulation **B93-058**
Multipassage Three-Dimensional Navier-Stokes Simulation of Turbine Rotor-Stator Interaction **B93-055**
Efficient Hybrid Scheme for the Analysis of Counter-Rotating Propellers **B93-054**
New Two-Grid Acceleration Method for Unsteady Navier-Stokes Calculations **B93-040**
Quasi-Three-Dimensional Nonreflecting Boundary Conditions for Euler Equations Calculations **B93-039**
Multiblock Implicit Total Variation Diminishing Solution of High-Speed Internal Flows **B93-038**

Electrostatic Field Effects on a Rotating Liquid Film Conical Radiator B93-037
Scramjet Fuel-Air Mixing Establishment in a Pulse Facility B93-017
Cascade Flow Calculations by a Multigrid Euler Method B93-012
Grid Generation for Three-Dimensional Turbomachinery Geometries Including Tip Clearance B93-008

Hypersonic Flow

Scramjet Nozzle Experiment with Hypersonic External Flow B93-074
Research on Supersonic Combustion B93-072
Designing Hypersonic Inlets for Bow Shock Location Control B93-045
Investigation of a Two-Dimensional Scramjet Inlet, $M_\infty = 8–18$ and $T_0 = 4100K$ B93-019
Role of Hydrogen/Air Chemistry in Nozzle Performance for a Hypersonic Propulsion System B93-018
Scramjet Fuel-Air Mixing Establishment in a Pulse Facility B93-017
Numerical Analysis of Reacting Flows Using Finite Rate Chemistry Models B93-016

Inlet, Nozzle, Diffusor, and Channel Flows

CFD-Based Three-Dimensional Turbofan Exhaust Nozzle Analysis System B93-118
Full Navier-Stokes Analysis of an Axisymmetric Scramjet Inlet B93-116
Validation Studies of Scramjet Nozzle Performance B93-102
Unified Navier-Stokes Flowfield and Performance Analysis of Liquid Rocket Engines B93-095
Modeling Supersonic Inlet Boundary-Layer Bleed Roughness B93-086
Verification of the Theoretical Discharge Coefficient of a Subcritical Airflow Meter B93-085
Inviscid Finite-Volume Lambda Formulation B93-083
Scramjet Nozzle Experiment with Hypersonic External Flow B93-074
Computational Study of Advanced Exhaust System Transition Ducts with Experimental Validation B93-061
Commercial Turbofan Engine Exhaust Nozzle Flow Analyses B93-060
Computations and Experiments for a Multiple Normal Shock/Boundary-Layer Interaction B93-057
Designing Hypersonic Inlets for Bow Shock Location Control B93-045
Multiblock Implicit Total Variation Diminishing Solution of High-Speed Internal Flows B93-038
Reduced-Length Scarfed-Nozzles for Thrust Vector Adjustment B93-035
Investigation of a Two-Dimensional Scramjet Inlet, $M_\infty = 8–18$ and $T_0 = 4100K$ B93-019
Role of Hydrogen/Air Chemistry in Nozzle Performance for a Hypersonic Propulsion System B93-018
Numerical Analysis of Reacting Flows Using Finite Rate Chemistry Models B93-016
Cascade Flow Calculations by a Multigrid Euler Method B93-012
Advanced Direct-Design Procedure for Centrifugal Impellers B93-009
Measured Thrust Losses Associated with Secondary Air Injection Through Nozzle Walls B93-006
Gas-Dynamic Flow in a Spinning, Coning Solid Rocket Motor B93-005

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Lift off Characteristics of Methane Jet Diffusion Flames B93-093
Wake Mixing and Performance of a Compressor Cascade with Crenulated Trailing Edges B93-042
Measured Thrust Losses Associated with Secondary Air Injection Through Nozzle Walls B93-006

Multiphase Flows

Time-Marching Method for the Prediction of Two-Dimensional, Unsteady Flows of Condensing Steam B93-081
Gas-Dynamic Flow in a Spinning, Coning Solid Rocket Motor B93-005
Experimental and Theoretical Study on Hollow-Cone Spray B93-004
Influence of Ambient Air Pressure on Effervescent Atomization B93-002

Plasmadynamics and MHD

An Investigation of Secondary Flows in Magnetohydrodynamic Channels B93-124
Applied-Field MPD Thruster Performance with Hydrogen and Argon Propellants B93-111
Current Distributions in a Quasisteady Magnetoplasmadynamic Arcjet B93-109
Application of a Quadruple Probe Technique to MPD Thruster Plume Measurements B93-108
Injected Propellant Ionization in MPD Thrusters B93-107
Plasma Detachment from a Magnetic Nozzle B93-106
Analysis and Design of an Ultrahigh Temperature Hydrogen-Fueled MHD Generator B93-104
Thermal Nonequilibrium in a Low-Power Arcjet Nozzle B93-077

Rarefied Flows

Measurement and Analysis of a Small Nozzle Plume in Vacuum B93-090
Investigation of a Two-Dimensional Scramjet Inlet, $M_\infty = 8–18$ and $T_0 = 4100K$ B93-019

Reacting Flows and Combustion

Effects of Fuel-Air Unmixedness on NO*x* Emissions B93-099
Mixing in the Dome Region of a Staged Gas Turbine Combustor B93-098
Combustion Characteristics of a Boron-Fueled Solid Fuel Ramjet with Aft-Burner B93-097
Unified Navier-Stokes Flowfield and Performance Analysis of Liquid Rocket Engines B93-095
Lift off Characteristics of Methane Jet Diffusion Flames B93-093
Feedback Control of an Unstable Ducted Flame B93-075
Flame Radiation and Acoustic Intensity Measurements in Acoustically Excited Diffusion Flames B93-032
Evaluation of the Munich Method for Modeling Rocket Engine Performance B93-029
Coherent Anti-Stokes Raman Spectroscopy Temperature Measurements in a Hydrogen-Fueled Supersonic Combustor B93-025
Effects of Bypass Air on Boron Combustion in Solid Fuel Ramjets B93-022
Role of Hydrogen/Air Chemistry in Nozzle Performance for a Hypersonic Propulsion System B93-018

Separated Flows

Inlet Turbulence Distortion and Viscous Flow Development in a Controlled-Diffusion Compressor Cascade at Very High Incidence B93-056

Shock Waves and Detonations

Computations and Experiments for a Multiple Normal Shock/Boundary-Layer Interaction B93-057
Designing Hypersonic Inlets for Bow Shock Location Control B93-045

Subsonic Flow

Rotating Stall Performance and Recoverability of a High-Speed 10-Stage Axial Flow Compressor B93-041
Evaluation of Brush Seals for Limited-Life Engines B93-015

Supersonic Flow

Numerical Modeling of Wall-Injected Scramjet Experiments B93-026
Dispersion of Solid Particles in Compressible Mixing Layers B93-011

Transonic Flow

Computational Analysis of Vented Supersonic Exhaust Nozzles Using a Multiblock/Multizone Strategy B93-117
Multigrid Calculation of Three-Dimensional Viscous Cascade Flows B93-084
Inviscid Finite-Volume Lambda Formulation B93-083
Quasi-Three-Dimensional Nonreflecting Boundary Conditions for Euler Equations Calculations B93-039
Cascade Flow Calculations by a Multigrid Euler Method B93-012

Unsteady Flows

Airfoil Wake and Linear Theory Gust Response Including Sub- and Superresonant Flow Conditions B93-119
Hydraulic and Mechanical Performance of LE-7 Lox Pump Inducer B93-115

Time-Marching Method for the Prediction of Two-Dimensional, Unsteady Flows of Condensing Steam B93-081
Supersonic Turbomachine Rotor Flutter Control By Aerodynamic Detuning B93-079
Multipassage Three-Dimensional Navier-Stokes Simulation of Turbine Rotor-Stator Interaction B93-055
New Two-Grid Acceleration Method for Unsteady Navier-Stokes Calculations B93-040

Viscous Non-Boundary-Layer Flows

Prediction of Turbulent Coaxial Streams of Constant and Variable Density B93-082

Interdisciplinary Topics

Analytical and Numerical Methods

Approach to Modeling Continuous Turbine Engine Operation from Startup to Shutdown B93-066

Lasers and Laser Applications

Erosion Rate Diagnostics in Ion Thrusters Using Laser-Induced Fluorescence B93-052
Photovoltaic Receivers for Laser Beamed Power in Space B93-014

Research Facilities and Instrumentation

High-Pressure Hypervelocity Electrothermal Wind-Tunnel Performance Study and Subscale Tests B93-103

Launch Vehicle and Missile (LV/M) Technology

Propulsion and Propellant Systems

Wind-Tunnel Evaluation of Mid-Airframe Installed Turbojet Engines B93-120
Hydraulic and Mechanical Performance of LE-7 Lox Pump Inducer B93-115
Metal Atoms Trapped in Cryogenic Matrices as Potential Rocket Fuels B93-100
Development of a Dual-Frequency Microwave Burn-Rate Measurement System for Solid Rocket Propellant B93-071
Rotordynamic Coefficient Test Results for a Four-Stage Brush Seal B93-065
Reduced-Length Scarfed-Nozzles for Thrust Vector Adjustment B93-035
Pressure Oscillations In Post-Challenger Space Shuttle Redesigned Solid Rocket Motors B93-033
Design and Fabrication Techniques for a Large Titanium 15-3-3-3 Propellant Tank B93-024

Testing, Flight and Ground

Wind-Tunnel Evaluation of Mid-Airframe Installed Turbojet Engines B93-120

Vibration

Rotordynamic Coefficient Test Results for a Four-Stage Brush Seal B93-065

Propulsion

Airbreathing Propulsion

Conceptional Study of Separated Core Ultrahigh Bypass Engine B93-121
Wind-Tunnel Evaluation of Mid-Airframe Installed Turbojet Engines B93-120
Computational Analysis of Vented Supersonic Exhaust Nozzles Using a Multiblock/Multizone Strategy B93-117
High-Pressure Hypervelocity Electrothermal Wind-Tunnel Performance Study and Subscale Tests B93-103
Mixing in the Dome Region of a Staged Gas Turbine Combustor B93-098
Modeling of Spray Droplets Deformation and Breakup B93-092
Preliminary Assessment of Exhaust Systems for High-Mach (4–6) Fighter Aircraft B93-088
Design Verification of Ground Run-up Noise Suppressors for Afterburning Engines B93-087
Verification of the Theoretical Discharge Coefficient of a Subcritical Airflow Meter B93-085
Multigrid Calculation of Three-Dimensional Viscous Cascade Flows B93-084
Blade Row Interaction Effects on Compressor Measurements B93-080
Demonstration of Mode Transition in a Scramjet Combustor B93-073
Research on Supersonic Combustion B93-072
High-Temperature Supersonic Combustion Testing with Optical Diagnostics B93-069
Issues Associated with Long-Duration High-Enthalpy Scramjet Combustor Testing B93-068
Approach to Modeling Continuous Turbine Engine Operation from Startup to Shutdown B93-066
Rotordynamic Coefficient Test Results for a Four-Stage Brush Seal B93-065
Computational Study of Advanced Exhaust System Transition Ducts with Experimental Validation B93-061
Study on Vortex Generator Flow Control for the Management of Inlet Distortion B93-059
Inlet Turbulence Distortion and Viscous Flow Development in a Controlled-Diffusion Compressor Cascade at Very High Incidence B93-056
Multipassage Three-Dimensional Navier-Stokes Simulation of Turbine Rotor-Stator Interaction B93-055
Numerical Simulation of Turbine "Hot Spot" Alleviation Using Film Cooling B93-047
Wake Mixing and Performance of a Compressor Cascade with Crenulated Trailing Edges B93-042
Rotating Stall Performance and Recoverability of a High-Speed 10-Stage Axial Flow Compressor B93-041
Multiblock Implicit Total Variation Diminishing Solution of High-Speed Internal Flows B93-038
Laser-Initiated Conical Detonation Wave for Supersonic Combustion. II B93-028
Numerical Modeling of Wall-Injected Scramjet Experiments B93-026
Effects of Bypass Air on Boron Combustion in Solid Fuel Ramjets B93-022
Aerothermodynamic Analysis of Combined-Cycle Propulsion Systems B93-021
Evaluation of Brush Seals for Limited-Life Engines B93-015
Dispersion of Solid Particles in Compressible Mixing Layers B93-011
Wake Ingestion Propulsion Benefit B93-010
Grid Generation for Three-Dimensional Turbomachinery Geometries Including Tip Clearance B93-008

Combustion and Combustor Designs

Numerical Studies of Solid Propellant Erosive Burning B93-114
Erosive Burning of Solid Propellants B93-112
Effects of Fuel-Air Unmixedness on NOx Emissions B93-099
Mixing in the Dome Region of a Staged Gas Turbine Combustor B93-098
Effects of Side-Inlet Angle in a Three-Dimensional Side-Dump Combustor B93-096
Comprehensive Review of Liquid-Propellant Combustion Instabilities in F-1 Engines B93-094
Comparison of Droplet Combustion Models in Spray Combustion B93-089
Feedback Control of an Unstable Ducted Flame B93-075
Some Aspects of Secondary Atomization of Aluminum/Hydrocarbon Slurry Propellants B93-049
Numerical Simulations of Gas Turbine Combustor Flows B93-046
Magnesium and Carbon Dioxide: A Rocket Propellant for Mars Missions B93-030
Laser-Initiated Conical Detonation Wave for Supersonic Combustion. II B93-028
Approach to the Measurement of Burning-Surface Temperature of Boron B93-023
Influence of Ambient Air Pressure on Effervescent Atomization B93-002

Combustion Instability

Comprehensive Review of Liquid-Propellant Combustion Instabilities in F-1 Engines B93-094
Lift off Characteristics of Methane Jet Diffusion Flames B93-093
Feedback Control of an Unstable Ducted Flame B93-075
Linear Burning Rate Dynamics of Solids Subjected to Pressure or External Radiant Heat Flux Oscillations B93-034
Pressure Oscillations in Post-Challenger Space Shuttle Redesigned Solid Rocket Motors B93-033
Flame Radiation and Acoustic Intensity Measurements in Acoustically Excited Diffusion Flames B93-032

Droplet Characterization

Modeling of Spray Droplets Deformation and Breakup B93-092
Some Aspects of Secondary Atomization of Aluminum/Hydrocarbon Slurry Propellants B93-049
Experimental and Theoretical Study on Hollow-Cone Spray B93-004

Influences on the Sprays Formed by High-Shear Fuel Nozzle/Swirler Assemblies B93-003
Influence of Ambient Air Pressure on Effervescent Atomization B93-002

Ducted Rocket Engines

Relative Sliding Durability of Two Candidate High-Temperature Oxide Fiber Seal Materials B93-044

Electric and Advanced Space Propulsion

Cathode Phenomena in Plasma Thrusters B93-123
Constrictor Flow Analysis of a Medium Power Hydrogen Arcjet B93-122
Applied-Field MPD Thruster Performance with Hydrogen and Argon Propellants B93-111
Performance Characteristics of a Medium Power Hydrogen Arcjet B93-110
Current Distributions in a Quasisteady Magnetoplasmadynamic Arcjet B93-109
Application of a Quadruple Probe Technique to MPD Thruster Plume Measurements B93-108
Injected Propellant Ionization in MPD Thrusters B93-107
Plasma Detachment from a Magnetic Nozzle B93-106
Measurement and Analysis of a Small Nozzle Plume in Vacuum B93-090
Diagnostics and Performance of a Low-Power MPD Thruster with Applied Magnetic Nozzle B93-078
Thermal Nonequilibrium in a Low-Power Arcjet Nozzle B93-077
Evolving SP-100 Powerplants via Electric Propulsion to GEO and Lunar Orbit B93-063
Simulating a 1-kW Arcjet Thruster Using a Nonlinear Active Load B93-053
Erosion Rate Diagnostics in Ion Thrusters Using Laser-Induced Fluorescence B93-052
Anode Power Deposition in Magnetoplasmadynamic Thrusters B93-051
Bare Wire Anodes for Electrodynamic Tethers B93-050
Radiation-Enhanced Dissociation of Hydrogen in Nuclear Rockets B93-031

Engine Performance

Erosion Rate Diagnostics in Ion Thrusters Using Laser-Induced Fluorescence B93-052
Numerical Simulation of Turbine "Hot Spot" Alleviation Using Film Cooling B93-047
Experiments on Heat Transfer in a Cryogenic Engine Thrust Chamber B93-036
Magnesium and Carbon Dioxide: A Rocket Propellant for Mars Missions B93-030
Evaluation of the Munich Method for Modeling Rocket Engine Performance B93-029
Aerothermodynamic Analysis of Combined-Cycle Propulsion Systems B93-021
Evaluation of Brush Seals for Limited-Life Engines B93-015

Environmental Effects

Effects of Fuel-Air Unmixedness on NOx Emissions B93-099

Fuels and Propellants, Properties of

Numerical Studies of Solid Propellant Erosive Burning B93-114
Erosive Burning in Solid Propellant Motors B93-113
Erosive Burning of Solid Propellants B93-112
Experimental Study on Liquid Quench of Solid Rocket Motor B93-101
Combustion Characteristics of a Boron-Fueled Solid Fuel Ramjet with Aft-Burner B93-097
Some Aspects of Secondary Atomization of Aluminum/Hydrocarbon Slurry Propellants B93-049
Compressive Mechanical Property Tests for Energetic Material Hazard Sensitivity B93-048
Magnesium and Carbon Dioxide: A Rocket Propellant for Mars Missions B93-030
Approach to the Measurement of Burning-Surface Temperature of Boron B93-023
Static Tests of Jet Fuel Thermal And Oxidative Stability B93-001

Ignition and Ignitor Design

Some Governing Parameters of Plasma Torch Igniter/Flameholder in a Scramjet Combustor B93-027
Approach to the Measurement of Burning-Surface Temperature of Boron B93-023

Injector Design and Characterization

Comprehensive Review of Liquid-Propellant Combustion Instabilities in F-1 Engines B93-094
Effects of Enjector Geometry on Scramjet Combustor Performance B93-020
Influences on the Sprays Formed by High-Shear Fuel Nozzle/Swirler Assemblies B93-003

Liquid Rocket Motors and Missile Systems

Hydraulic and Mechanical Performance of LE-7 Lox Pump Inducer B93-115
Design and Fabrication Techniques for a Large Titanium 15-3-3-3 Propellant Tank B93-024

Propulsion Hazards

Compressive Mechanical Property Tests for Energetic Material Hazard Sensitivity B93-048

Ramjet Combustors

Combustion Characteristics of a Boron-Fueled Solid Fuel Ramjet with Aft-Burner B93-097
Effects of Bypass Air on Boron Combustion in Solid Fuel Ramjets B93-022

Ramjets and Scramjets

Full Navier-Stokes Analysis of an Axisymmetric Scramjet Inlet B93-116
Validation Studies of Scramjet Nozzle Performance B93-102
Scramjet Nozzle Experiment with Hypersonic External Flow B93-074
Demonstration of Mode Transition in a Scramjet Combustor B93-073
Research on Supersonic Combustion B93-072
High-Temperature Supersonic Combustion Testing with Optical Diagnostics B93-069
Experimental Supersonic Hydrogen Combustion Employing Staged Injection Behind a Rearward-Facing Step B93-067
Development of Braided Rope Seals for Hypersonic Engine Applications: Flow Modeling B93-064
Relative Sliding Durability of Two Candidate High-Temperature Oxide Fiber Seal Materials B93-044
Some Governing Parameters of Plasma Torch Igniter/Flameholder in a Scramjet Combustor B93-027
Numerical Modeling of Wall-Injected Scramjet Experiments B93-026
Aerothermodynamic Analysis of Combined-Cycle Propulsion Systems B93-021
Effects of Enjector Geometry on Scramjet Combustor Performance B93-020
Scramjet Fuel-Air Mixing Establishment in a Pulse Facility B93-017
Dispersion of Solid Particles in Compressible Mixing Layers B93-011

Solid Rocket Motors and Missile Systems

Numerical Studies of Solid Propellant Erosive Burning B93-114
Erosive Burning in Solid Propellant Motors B93-113
Erosive Burning of Solid Propellants B93-112
Experimental Study on Liquid Quench of Solid Rocket Motor B93-101
Ballistics of Solid Rocket Motors with Spatial Burning Rate Variations B93-091
Development of a Dual-Frequency Microwave Burn-Rate Measurement System for Solid Rocket Propellant B93-071
Compressive Mechanical Property Tests for Energetic Material Hazard Sensitivity B93-048
Reduced-Length Scarfed-Nozzles for Thrust Vector Adjustment B93-035
Linear Burning Rate Dynamics of Solids Subjected to Pressure or External Radiant Heat Flux Oscillations B93-034
Pressure Oscillations in Post-Challenger Space Shuttle Redesigned Solid Rocket Motors B93-033
Gas-Dynamic Flow in a Spinning, Coning Solid Rocket Motor B93-005

Supersonic Combustion

Demonstration of Mode Transition in a Scramjet Combustor B93-073
High-Temperature Supersonic Combustion Testing with Optical Diagnostics B93-069
Issues Associated with Long-Duration High-Enthalpy Scramjet Combustor Testing B93-068
Experimental Supersonic Hydrogen Combustion Employing Staged Injection Behind a Rearward-Facing Step B93-067
Laser-Initiated Conical Detonation Wave for Supersonic Combustion. II B93-028
Some Governing Parameters of Plasma Torch Igniter/Flameholder in a Scramjet Combustor B93-027
Coherent Anti-Stokes Raman Spectroscopy Temperature Measurements in a Hydrogen-Fueled Supersonic Combustor B93-025

Effects of Enjector Geometry on Scramjet Combustor Performance B93-020

Transient Combustion and Detonation

Experimental Study on Liquid Quench of Solid Rocket Motor B93-101
Linear Burning Rate Dynamics of Solids Subjected to Pressure or External Radiant Heat Flux Oscillations B93-034

Space Technology

Mission Design and Analysis

Evolving SP-100 Powerplants via Electric Propulsion to GEO and Lunar Orbit B93-063

Spacecraft Power

Evolving SP-100 Powerplants via Electric Propulsion to GEO and Lunar Orbit B93-063
Bare Wire Anodes for Electrodynamic Tethers B93-050
Photovoltaic Receivers for Laser Beamed Power in Space B93-014
Ultrahigh Temperature Vapor-Core Reactor–Magnetohydrodynamic System for Space Nuclear Electric Power B93-013

Spacecraft Propulsion System Integration

Measurement and Analysis of a Small Nozzle Plume in Vacuum B93-090
Temperature Control of a Liquid Helium Propulsion System B93-076

Spacecraft Thermal Management

Temperature Control of a Liquid Helium Propulsion System B93-076

Structural Mechanics and Materials

Aeroelasticity and Control

Supersonic Turbomachine Rotor Flutter Control By Aerodynamic Detuning B93-079

Materials Structural Properties

Development of Braided Rope Seals for Hypersonic Engine Applications: Flow Modeling B93-064

Structural Modeling

Development of Braided Rope Seals for Hypersonic Engine Applications: Flow Modeling B93-064

Thermophysics and Heat Transfer

Aerothermodynamics/Thermal Protection

Numerical Simulation of Turbine "Hot Spot" Alleviation Using Film Cooling B93-047
Measured Thrust Losses Associated with Secondary Air Injection Through Nozzle Walls B93-006

Cryogenics

Temperature Control of a Liquid Helium Propulsion System B93-076

Forced Convection

Experiments on Heat Transfer in a Cryogenic Engine Thrust Chamber B93-036

Nonintrusive Diagnostics

Development of a Dual-Frequency Microwave Burn-Rate Measurement System for Solid Rocket Propellant B93-071
Coherent Anti-Stokes Raman Spectroscopy Temperature Measurements in a Hydrogen-Fueled Supersonic Combustor B93-025

Thermal Modeling and Analysis

Experiments on Heat Transfer in a Cryogenic Engine Thrust Chamber B93-036

Thermochemistry and Chemical Kinetics

Radiation-Enhanced Dissociation of Hydrogen in Nuclear Rockets B93-031
Evaluation of the Munich Method for Modeling Rocket Engine Performance B93-029

Thermophysical Properties

Cathode Phenomena in Plasma Thrusters B93-123

Chronological Index

B92-135 Propellant Production from the Martian Atmosphere. J. V. Bowles and M. E. Tauber, *NASA Ames Research Center*; A. J. Anagnost, *Stanford University*; and T. Whittaker, *Sterling Software* (**8**, 4, p. 907) Article

Technical Comment by H. O. Ruppe, *Technische Universität München, Germany* (**9**, 3, p. 495) Reply (**9**, 3, p. 495)

B93-001 Static Tests of Jet Fuel Thermal And Oxidative Stability. Shawn P. Heneghan, *University of Dayton*; Stacey L. Locklear, David L. Geiger, and Steven D. Anderson, *Wright Laboratories, Wright-Patterson AFB*; and William D. Schulz, *Eastern Kentucky University* (**9**, 1, p. 5) Article

B93-002 Influence of Ambient Air Pressure on Effervescent Atomization. S. K. Chen and Arthur H. Lefebvre, *Purdue University*; and J. Rollbuhler, *NASA Lewis Research Center* (**9**, 1, p. 10) Article based on AIAA Paper 92-0460

B93-003 Influences on the Sprays Formed by High-Shear Fuel Nozzle/Swirler Assemblies. J. M. Cohen and T. J. Rosfjord, *United Technologies Research Center* (**9**, 1, p. 16) Article based on AIAA Paper 90-2193

B93-004 Experimental and Theoretical Study on Hollow-Cone Spray. Keh-Chin Chang, Muh-Rong Wang, Wen-Jing Wu, and Chia-Hong Hong, *National Cheng-Kung University, Taiwan, ROC* (**9**, 1, p. 28) Article

B93-005 Gas-Dynamic Flow in a Spinning, Coning Solid Rocket Motor. Dean L. Misterek, J. W. Murdock, and S. Koshigoe, *Aerospace Corporation* (**9**, 1, p. 35) Article based on AIAA Paper 91-1671

B93-006 Measured Thrust Losses Associated with Secondary Air Injection Through Nozzle Walls. David Azevedo, *Pratt & Whitney Aircraft* (**9**, 1, p. 43) Article based on AIAA Paper 91-2244

B93-007 Thrust Vectoring: Theory, Laboratory, and Flight Tests. Benjamin Gal-Or and Valery Sherbaum, *Technion—Israel Institute of Tecnology* (**9**, 1, p. 51) Article

B93-008 Grid Generation for Three-Dimensional Turbomachinery Geometries Including Tip Clearance. Anton H. Basson, Robert F. Kunz, and Budugur Lakshminarayana, *Pennsylvania State University* (**9**, 1, p. 59) Article based on AIAA Paper 91-2360

B93-009 Advanced Direct-Design Procedure for Centrifugal Impellers. Sarim N. J. Al-Zubaidy, *U.A.E. University, United Arab Emirates* (**9**, 1, p. 67) Article

B93-010 Wake Ingestion Propulsion Benefit. Leroy H. Smith Jr., *GE Aircraft Engines* (**9**, 1, p. 74) Article based on AIAA Paper 91-2007

B93-011 Dispersion of Solid Particles in Compressible Mixing Layers. Diana D. Glawe and Mo Samimy, *Ohio State University* (**9**, 1, p. 83) Article based on AIAA Paper 92-0176

B93-012 Cascade Flow Calculations by a Multigrid Euler Method. Feng Liu and Antony Jameson, *Princeton University* (**9**, 1, p. 90) Article

B93-013 Ultrahigh Temperature Vapor-Core Reactor—Magnetohydrodynamic System for Space Nuclear Electric Power. Isaac Maya, Samim Anghaie, Nils J. Diaz, and Edward T. Dugan, *University of Florida* (**9**, 1, p. 98) Article based on AIAA Paper 91-3632

B93-014 Photovoltaic Receivers for Laser Beamed Power in Space. Geoffrey A. Landis, *Sverdrup Technology, Inc.* (**9**, 1, p. 105) Article

B93-015 Evaluation of Brush Seals for Limited-Life Engines. Raymond E. Chupp, *Teledyne CAE*; and Paul Nelson, *USAF/WL/POTP, Wright-Patterson AFB* (**9**, 1, p. 113) Article based on AIAA Paper 90-2140

B93-016 Numerical Analysis of Reacting Flows Using Finite Rate Chemistry Models. Chae M. Rhie, Steven T. Stowers, and Houshang B. Ebrahimi, *Pratt and Whitney, United Technologies Corporation* (**9**, 1, p. 119) Article based on AIAA Paper 89-0459

B93-017 Scramjet Fuel-Air Mixing Establishment in a Pulse Facility. R. Clayton Rogers and Elizabeth H. Weidner, *NASA Langley Research Center* (**9**, 1, p. 127) Article based on AIAA Paper 91-0229

B93-018 Role of Hydrogen/Air Chemistry in Nozzle Performance for a Hypersonic Propulsion System. J. J. Sangiovanni and T. J. Barber, *United Technologies Research Center*; and S. A. Syed, *Pratt & Whitney Aircraft* (**9**, 1, p. 134) Article based on AIAA Paper 90-2492

B93-019 Investigation of a Two-Dimensional Scramjet Inlet, $M_\infty = 8$–18 and $T_0 = 4100$K. M. A. S. Minucci, *Instituto de Estudos Avancados-CTA, Brazil*; and Henry T. Nagamatsu, *Rensselaer Polytechnic Institute* (**9**, 1, p. 139) Article based on AIAA Paper 91-0013

B93-020 Effects of Injector Geometry on Scramjet Combustor Performance. Nobuo Chinzei, Tomoyuki Komuro, Kenji Kudou, Atsuo Murakami, Kouichiro Tani, Goro Masuya, and Yoshio Wakamatsu, *National Aerospace Laboratory, Japan* (**9**, 1, p. 146) Article

B93-021 Aerothermodynamic Analysis of Combined-Cycle Propulsion Systems. A. R. Ganji, M. Khadem, and S. M. H. Khandani, *Berkeley Applied Science and Engineering, Inc.* (**9**, 1, p. 153) Technical Note

B93-022 **Effects of Bypass Air on Boron Combustion in Solid Fuel Ramjets.** Benveniste Natan and Alon Gany, *Technion–Israel Institute of Technology, Israel* (9, 1, p. 155) Technical Note based on AIAA Paper 89-2886

B93-023 **Approach to the Measurement of Burning-Surface Temperature of Boron.** W. H. Hsieh and C. L. Yeh, *Pennsylvania State University* (9, 1, p. 157) Technical Note based on AIAA Paper 92-3629

B93-024 **Design and Fabrication Techniques for a Large Titanium 15-3-3-3 Propellant Tank.** C. D. Knauer and F. W. Anderson, *Hughes Aircraft Company*; and R. Edman, *Fansteel/PSM* (9, 2, p. 161) Synoptic based on AIAA Paper 91-1838

B93-025 **Coherent Anti-Stokes Raman Spectroscopy Temperature Measurements in a Hydrogen-Fueled Supersonic Combustor.** Michael W. Smith, Olin Jarrett Jr., Richard R. Antcliff, and G. Burton Northam, *NASA Langley Research Center*; Andrew D. Cutler, *George Washington University*; and David J. Taylor, *Los Alamos National Laboratory* (9, 2, p. 163) Article based on AIAA Paper 90-5260

B93-026 **Numerical Modeling of Wall-Injected Scramjet Experiments.** C. P. Brescianini and R. G. Morgan, *University of Queensland, Australia* (9, 2, p. 169) Article

B93-027 **Some Governing Parameters of Plasma Torch Igniter/Flameholder in a Scramjet Combustor.** G. Masuya, K. Kudou, A. Murakami, T. Komuro, K. Tani, T. Kanda, Y. Wakamatsu, and N. Chinzei, *National Aerospace Laboratory, Japan*; M. Sayama and K. Ohwaki, *Ishikawajima-Harima Heavy Industries Company, Inc., Japan*; and I. Kimura, *Tokai University, Japan* (9, 2, p. 176) Article based on AIAA Paper 90-2098

B93-028 **Laser-Initiated Conical Detonation Wave for Supersonic Combustion. II.** F. Fendell, J. Mitchell, R. McGregor, and M. Sheffield, *TRW Space & Technology Group* (9, 2, p. 182) Article based on AIAA Paper 92-0088

B93-029 **Evaluation of the Munich Method for Modeling Rocket Engine Performance.** Frank J. Zeleznik, *NASA Lewis Research Center* (9, 2, p. 191) Article

B93-030 **Magnesium and Carbon Dioxide: A Rocket Propellant for Mars Missions.** E. Ya. Shafirovich, A. A. Shiryaev, and U. I. Goldshleger, *Russian Academy of Sciences, Russia* (9, 2, p. 197) Article

B93-031 **Radiation-Enhanced Dissociation of Hydrogen in Nuclear Rockets.** Yoichi Watanabe, *University of Florida* (9, 2, p. 204) Article based on AIAA Paper 92-3817

B93-032 **Flame Radiation and Acoustic Intensity Measurements in Acoustically Excited Diffusion Flames.** T. Y. Chen, U. G. Hegde, B. R. Daniel, and B. T. Zinn, *Georgia Institute of Technology* (9, 2, p. 210) Article based on AIAA Paper 90-3929

B93-033 **Pressure Oscillations in Post-Challenger Space Shuttle Redesigned Solid Rocket Motors.** Fred S. Blomshield, *Naval Air Warfare Center*; and H. B. Mathes, *Comarco, Inc.* (9, 2, p. 217) Article based on AIAA Paper 91-0203

B93-034 **Linear Burning Rate Dynamics of Solids Subjected to Pressure or External Radiant Heat Flux Oscillations.** Steven F. Son and M. Quinn Brewster, *University of Illinois at Urbana-Champaign* (9, 2, p. 222) Article

B93-035 **Reduced-Length Scarfed-Nozzles for Thrust Vector Adjustment.** Jay S. Lilley, *U.S. Army Missile Command* (9, 2, p. 233) Article

B93-036 **Experiments on Heat Transfer in a Cryogenic Engine Thrust Chamber.** N. Sugathan, K. Srinivasan, and S. Srinivasa Murthy, *Indian Institute of Technology, India* (9, 2, p. 240) Article

B93-037 **Electrostatic Field Effects on a Rotating Liquid Film Conical Radiator.** Hyo Kim, S. G. Bankoff, and Michael J. Miksis, *Northwestern University* (9, 2, p. 245) Article

B93-038 **Multiblock Implicit Total Variation Diminishing Solution of High-Speed Internal Flows.** F. Grasso and M. Marini, *Universitá di Roma, Italy* (9, 2, p. 255) Article

B93-039 **Quasi-Three-Dimensional Nonreflecting Boundary Conditions for Euler Equations Calculations.** André P. Saxer and Michael B. Giles, *Massachusetts Institute of Technology* (9, 2, p. 263) Article based on AIAA Paper 91-1603

B93-040 **New Two-Grid Acceleration Method for Unsteady Navier-Stokes Calculations.** L. He, *Cambridge University, England, UK* (9, 2, p. 272) Article

B93-041 **Rotating Stall Performance and Recoverability of a High-Speed 10-Stage Axial Flow Compressor.** William W. Copenhaver, *Wright Laboratory, Wright-Patterson AFB*; and Theodore H. Okiishi, *Iowa State University* (9, 2, p. 281) Article based on AIAA Paper 89-2684

B93-042 **Wake Mixing and Performance of a Compressor Cascade with Crenulated Trailing Edges.** S. J. DeCook, P. I. King, and W. C. Elrod, *Air Force Institute of Technology, Wright-Patterson AFB* (9, 2, p. 293) Article

B93-043 **Modal Simulation of Gear Box Vibration with Experimental Correlation.** F. K. Choy and Y. F. Ruan, *University of Akron*; J. J. Zakrajsek and F. B. Oswald, *NASA Lewis Research Center* (9, 2, p. 301) Article based on AIAA Paper 92-3494

B93-044 **Relative Sliding Durability of Two Candidate High-Temperature Oxide Fiber Seal Materials.** Christopher DellaCorte and Bruce M. Steinetz, *NASA Lewis Research Center* (9, 2, p. 307) Article based on AIAA Paper 92-3713

B93-045 **Designing Hypersonic Inlets for Bow Shock Location Control.** Mark J. Lewis, *University of Maryland* (9, 2, p. 313) Article

B93-046 **Numerical Simulations of Gas Turbine Combustor Flows.** D. Lee, C. L. Yeh, and Y. M. Tsuei, *National Cheng Kung University, Taiwan, ROC*; and J. Chou, *Chung-Shan Institute of Science and Technology, Taiwan, ROC* (9, 2, p. 322) Article based on AIAA Paper 90-2305

B93-047 Numerical Simulation of Turbine "Hot Spot" Alleviation Using Film Cooling. Daniel J. Dorney and Roger L. Davis, *United Technologies Research Center* (**9**, 3, p. 329) Article based on AIAA Paper 92-3309

B93-048 Compressive Mechanical Property Tests for Energetic Material Hazard Sensitivity. K. P. Duffy and A. M. Mellor, *Vanderbilt University* (**9**, 3, p. 337) Article

B93-049 Some Aspects of Secondary Atomization of Aluminum/Hydrocarbon Slurry Propellants. Donn C. Mueller and Stephen R. Turns, *Pennsylvania State University* (**9**, 3, p. 345) Article based on AIAA Paper 91-3625

B93-050 Bare Wire Anodes for Electrodynamic Tethers. J. R. Sanmartín, *Universidad Politécnica de Madrid, Spain*; M. Martínez-Sánchez and E. Ahedo, *Massachusetts Institute of Technology* (**9**, 3, p. 353) Article

B93-051 Anode Power Deposition in Magnetoplasmadynamic Thrusters. A. D. Gallimore, A. J. Kelly, and R. G. Jahn, *Princeton University* (**9**, 3, p. 361) Article

B93-052 Erosion Rate Diagnostics in Ion Thrusters Using Laser-Induced Fluorescence. C. J. Gaeta, J. N. Matossian, R. S. Turley, J. R. Beattie, J. D. Williams, and W. S. Williamson, *Hughes Research Laboratories* (**9**, 3, p. 369) Article

B93-053 Simulating a 1-kW Arcjet Thruster Using a Nonlinear Active Load. Gene P. Altenburger and Roger J. King, *University of Toledo* (**9**, 3, p. 377) Article based on AIAA Paper 92-3528

B93-054 Efficient Hybrid Scheme for the Analysis of Counter-Rotating Propellers. R. Srivastava and Lakshmi N. Sankar, *Georgia Institute of Technology* (**9**, 3, p. 382) Article based on AIAA Paper 91-0703

B93-055 Multipassage Three-Dimensional Navier-Stokes Simulation of Turbine Rotor-Stator Interaction. N. K. Madavan, *MCAT Institute*; M. M. Rai, *NASA Ames Research Center*; and S. Gavali, *Fujitsu America, Inc.*, (**9**, 3, p. 389) Article based on AIAA Paper 91-2464

B93-056 Inlet Turbulence Distortion and Viscous Flow Development in a Controlled-Diffusion Compressor Cascade at Very High Incidence. G. V. Hobson and R. P. Shreeve, *Naval Postgraduate School* (**9**, 3, p. 397) Article based on AIAA Paper 91-2004

B93-057 Computations and Experiments for a Multiple Normal Shock/Boundary-Layer Interaction. B. F. Carroll and P. A. Lopez-Fernandez, *University of Florida*; and J. C. Dutton, *University of Illinois at Urbana-Champaign* (**9**, 3, p. 405) Article

B93-058 Using a Full Potential Solver for Propulsion System Exhaust Simulation. Robin G. Melvin, *The Boeing Company*; and Forrester T. Johnson, David P. Young, David W. Foutch, John E. Bussoletti, and Michael B. Bieterman, *The Boeing Company* (**9**, 3, p. 412) Article

B93-059 Study on Vortex Generator Flow Control for the Management of Inlet Distortion. Bernhard H. Anderson, *NASA Lewis Research Center*; and James Gibb, *Defense Research Agency, England, UK* (**9**, 3, p. 422) Article based on AIAA Paper 92-3177

B93-060 Commercial Turbofan Engine Exhaust Nozzle Flow Analyses. Khaled S. Abdol-Hamid, *Analytical Services and Materials, Inc.*; K. Uenishi and B. D. Keith, *ATO/General Electric Aircraft Engines*; and John R. Carlson, *NASA Langley Research Center* (**9**, 3, p. 431) Article based on AIAA Paper 92-2701

B93-061 Computational Study of Advanced Exhaust System Transition Ducts with Experimental Validation. C. Wu, S. Farokhi, and R. Taghavi, *University of Kansas* (**9**, 3, p. 437) Article based on AIAA Paper 92-3794

B93-062 Nonreflecting Boundary Conditions of Three-Dimensional Euler Equation Calculations for Strut Cascades. K. Imanari and H. Kodama, *Ishikawajima-Harima Heavy Industries, Japan* (**9**, 3, p. 443) Article based on AIAA Paper 92-3045

B93-063 Evolving SP-100 Powerplants via Electric Propulsion to GEO and Lunar Orbit. Robert E. English, *NASA Lewis Research Center* (**9**, 3, p. 449) Article based on AIAA Paper 91-3562

B93-064 Development of Braided Rope Seals for Hypersonic Engine Applications: Flow Modeling. R. Mutharasan, Bruce M. Steinetz, X. Tao, Guang-Wu Du, and Frank Ko, *Drexel University* (**9**, 3, p. 456) Article based on AIAA Paper 91-2495

B93-065 Rotordynamic Coefficient Test Results for a Four-Stage Brush Seal. Kelly J. Conner and Dara W. Childs, *Texas A&M University* (**9**, 3, p. 462) Article based on AIAA Paper 90-2139

B93-066 Approach to Modeling Continuous Turbine Engine Operation from Startup to Shutdown. M. A. Chappell, *Sverdrup Technology Inc., Arnold AFB*; and P. W. McLaughlin, *Simulation and Modeling Workshop* (**9**, 3, p. 466) Article based on AIAA Paper 91-2373

B93-067 Experimental Supersonic Hydrogen Combustion Employing Staged Injection Behind a Rearward-Facing Step. John D. Abbitt III and Corin Segal, *University of Florida*; and James C. McDaniel, Roland H. Krauss, and Robert B. Whitehurst, *University of Virginia* (**9**, 3, p. 472) Article based on AIAA Paper 92-0090

B93-068 Issues Associated with Long-Duration High-Enthalpy Scramjet Combustor Testing. M. W. Thompson and M. A. Friedman, *Johns Hopkins University Applied Physics Laboratory* (**9**, 3, p. 479) Article based on AIAA Paper 91-5104

B93-069 High-Temperature Supersonic Combustion Testing with Optical Diagnostics. T. E. Parker, M. G. Allen, W. G. Reinecke, H. H. Legner, R. R. Foutter, and W. T. Rawlins, *Physical Sciences, Inc.* (**9**, 3, p. 486) Article based on AIAA Paper 92-0761

B93-070 **Convenient Method to Convert Two-Dimemsional CFD Codes into Axisymmetric Ones.** Sheng-Tao Yu, *Sverdrup Technology, Inc.* (**9**, 3, p. 493) Technical Note

B93-071 **Development of a Dual-Frequency Microwave Burn-Rate Measurement System for Solid Rocket Propellant .** David T. Foss, Richard J. Roby, and Walter F. O'Brien, *Virginia Polytechnic Institute and State University* (**9**, 4, p. 497) Synoptic based on AIAA Paper 89-2530

B93-072 **Research on Supersonic Combustion.** F. S. Billig, *Johns Hopkins University* (**9**, 4, p. 499) Survey Paper

B93-073 **Demonstration of Mode Transition in a Scramjet Combustor.** G. A. Sullins, *Johns Hopkins University* (**9**, 4, p. 515) Article

B93-074 **Scramjet Nozzle Experiment with Hypersonic External Flow.** Shigeya Watanabe, *National Aerospace Laboratory, Japan*(**9**, 4, p. 521) Article based on AIAA Paper 92-3289

B93-075 **Feedback Control of an Unstable Ducted Flame.** T. P. Parr, E. Gutmark, D. M. Hanson-Parr, and K. C. Schadow, *Naval Air Warfare Center Weapons Division* (**9**, 4, p. 529) Article

B93-076 **Temperature Control of a Liquid Helium Propulsion System.** Peter Wiktor, *Stanford University* (**9**, 4, p. 536) Article based on AIAA Paper 91-3553

B93-077 **Thermal Nonequilibrium in a Low-Power Arcjet Nozzle.** Dieter M. Zube, *Universität Stuttgart, Germany*; and Roger M. Myers, *Sverdrup Technology, Inc.* (**9**, 4, p. 545) Article based on AIAA Paper 91-2113

B93-078 **Diagnostics and Performance of a Low-Power MPD Thruster with Applied Magnetic Nozzle.** T. M. York, C. Zakrzwski, and G. Soulas, *Ohio State University* (**9**, 4, p. 553) Article based on AIAA Paper 90-2665

B93-079 **Supersonic Turbomachine Rotor Flutter Control By Aerodynamic Detuning.** Karen M. Spara and Sanford Fleeter, *Purdue University* (**9**, 4, p. 561) Article based on AIAA Paper 89-2685

B93-080 **Blade Row Interaction Effects on Compressor Measurements.** T. Shang, Alan H. Epstein, and M. B. Giles, *Massachusetts Institute of Technology*; and A. K. Sehra, *Textron Lycoming* (**9**, 4, p. 569) Article

B93-081 **Time-Marching Method for the Prediction of Two-Dimensional, Unsteady Flows of Condensing Steam.** A. J. White and J. B. Young, *University of Cambridge, England, UK* (**9**, 4, p. 579) Article

B93-082 **Prediction of Turbulent Coaxial Streams of Constant and Variable Density.** Richard W. Johnson, *EG&G Idaho, Inc.* (**9**, 4, p. 588) Article

B93-083 **Inviscid Finite-Volume Lambda Formulation.** Francesco Casalini and Andrea Dadone, *Politecnico di Bari, Italy* (**9**, 4, p. 597) Article based on AIAA Paper 91-2258

B93-084 **Multigrid Calculation of Three-Dimensional Viscous Cascade Flows.** A. Arnone, *University of Florence, Italy*; M.-S. Liou and L. A. Povinelli, *NASA Lewis Research Center* (**9**, 4, p. 605) Article based on AIAA Paper 91-3238

B93-085 **Verification of the Theoretical Discharge Coefficient of a Subcritical Airflow Meter.** D. J. Lahti, *GE Aircraft Engines*; and A. Hamed, *University of Cincinnati* (**9**, 4, p. 615) Article

B93-086 **Modeling Supersonic Inlet Boundary-Layer Bleed Roughness.** Gerald C. Paynter, David A. Treiber, and W. David Kneeling, *The Boeing Company* (**9**, 4, p. 622) Article

B93-087 **Design Verification of Ground Run-up Noise Suppressors for Afterburning Engines.** S. A. Fisher and A. M. Abdel-Fattah, *DSTO Aeronautical Research Laboratory, Australia*; and L. A. Challis, *Challis and Associates Pty., Ltd., Australia* (**9**, 4, p. 628) Article

B93-088 **Preliminary Assessment of Exhaust Systems for High-Mach (4–6) Fighter Aircraft.** A. P. Kuchar and J. P. Wolf, *GE Aircraft Engines* (**9**, 4, p. 636) Article based on AIAA Paper 89-2356

B93-089 **Comparison of Droplet Combustion Models in Spray Combustion.** T. L. Jiang and W. Hsu, *National Cheng Kung University, Taiwan, ROC* (**9**, 4, p. 644) Technical Note

B93-090 **Measurement and Analysis of a Small Nozzle Plume in Vacuum.** P. F. Penko, *NASA Lewis Research Center*; I. D. Boyd, *Cornell University*; and D. L. Meissner and K. J. DeWitt, *University of Toledo* (**9**, 4, p. 646) Technical Note based on AIAA Paper 92-3108

B93-091 **Ballistics of Solid Rocket Motors with Spatial Burning Rate Variations.** S. D. Heister, *Purdue University* (**9**, 4, p. 649) Technical Note based on AIAA Paper 91-3394

B93-092 **Modeling of Spray Droplets Deformation and Breakup.** E. A. Ibrahim, *Tuskegee University*; and H. Q. Yang and A. J. Przekwas, *CFD Research Corporation* (**9**, 4, p. 651) Technical Note

B93-093 **Lift off Characteristics of Methane Jet Diffusion Flames.** J. P. Seaba and L.-D. Chen, *University of Iowa*; and W. M. Roquemore, *Wright Laboratory, Wright-Patterson AFB* (**9**, 4, p. 654) Technical Note

B93-094 **Comprehensive Review of Liquid-Propellant Combustion Instabilities in F-1 Engines.** Joseph C. Oefelein and Vigor Yang, *Pennsylvania State University* (**9**, 5, p. 657) Survey Paper

B93-095 **Unified Navier-Stokes Flowfield and Performance Analysis of Liquid Rocket Engines.** Ten-See Wang, *NASA Marshall Space Flight Center*; and Yen-Sen Chen, *Engineering Sciences, Inc.* (**9**, 5, p. 678) Article based on AIAA Paper 90-2494

B93-096 **Effects of Side-Inlet Angle in a Three-Dimensional Side-Dump Combustor.** Ruey-Hor Yen and Tzu-Hsiang Ko, *National Taiwan University, Taiwan, ROC* (**9**, 5, p. 686) Article

B93-097 Combustion Characteristics of a Boron-Fueled Solid Fuel Ramjet with Aft-Burner. Benveniste Natan and Alon Gany, *Technion-Israel Institute of Technology, Israel* (9, 5, p. 694) Article

B93-098 Mixing in the Dome Region of a Staged Gas Turbine Combustor. W. A. Sowa, R. A. Brady, and G. S. Samuelsen, *University of California, Irvine* (9, 5, p. 702) Article based on AIAA Paper 92-3089

B93-099 Effects of Fuel-Air Unmixedness on NOx Emissions. Thomas F. Fric, *General Electric Corporate Research and Development* (9, 5, p. 708) Article

B93-100 Metal Atoms Trapped in Cryogenic Matrices as Potential Rocket Fuels. A. T. Pritt Jr., N. Presser, and R. R. Herm, *The Aerospace Corporation* (9, 5, p. 714) Article

B93-101 Experimental Study on Liquid Quench of Solid Rocket Motor. Jingi Yin, Xinping Wu, Guangshou Su, Baoqing Zhang, and Kexiu Wang, *Northwestern Polytechnical University, PRC* (9, 5, p. 719) Article based on AIAA Paper 90-2091

B93-102 Validation Studies of Scramjet Nozzle Performance. Tohru Mitani, Shuichi Ueda, Koichiro Tani, Shigeru Sato, and Hiroshi Miyajima, *National Aerospace Laboratory, Japan*; and Masashi Matsumoto and Shouhachi Yasu, *Ishikawajima-Harima Heavy Industry Co., Ltd., Japan* (9, 5, p. 725) Article based on AIAA Paper 92-3290

B93-103 High-Pressure Hypervelocity Electrothermal Wind-Tunnel Performance Study and Subscale Tests. Oussama F. Rizkalla and Wallace Chinitz, *General Applied Science Laboratories*; F. Douglas Witherspoon, *GT-Devices, Inc.*; and Rodney L. Burton, *University of Illinois* (9, 5, p. 731) Article based on AIAA Paper 92-0329

B93-104 Analysis and Design of an Ultrahigh Temperature Hydrogen-Fueled MHD Generator. Jeffrey P. Moder, Leik N. Myrabo, and Deborah A. Kaminski, *Rensselaer Polytechnic Institute* (9, 5, p. 739) Article

B93-105 Effects of External Control Circuit on Coal-Fired Supersonic Diagonal-Type MHD Generator. M. Ishikawa, T. Suemura, M. Fujita, and J. Umoto, *Kyoto University, Japan* (9, 5, p. 749) Article

B93-106 Plasma Detachment from a Magnetic Nozzle. E. B. Hooper, *Lawrence Livermore National Laboratory* (9, 5, p. 757) Article based on AIAA Paper 91-2590

B93-107 Injected Propellant Ionization in MPD Thrusters. Rodney L. Burton and Nicholas Tiliakos, *University of Illinois at Urbana–Champaign* (9, 5, p. 764) Article

B93-108 Application of a Quadruple Probe Technique to MPD Thruster Plume Measurements. Rodney L. Burton and Susan G. DelMedico, *University of Illinois at Urbana–Champaign*; and J. Chris Andrews, *Philips Laboratory, Edwards AFB* (9, 5, p. 771) Article

B93-109 Current Distributions in a Quasisteady Magnetoplasmadynamic Arcjet. Hirokazu Tahara, Yoichi Kagaya, and Takao Yoshikawa, *Osaka University, Japan* (9, 5, p. 778) Technical Note based on AIAA Paper 87-1093

B93-110 Performance Characteristics of a Medium Power Hydrogen Arcjet. B. Glocker and M. Auweter-Kurtz, *Institut für Raumfahrtsysteme, Universität Stuttgart, Germany* (9, 5, p. 779) Technical Note

B93-111 Applied-Field MPD Thruster Performance with Hydrogen and Argon Propellants. Roger M. Myers, *Sverdrup Technology, Inc.* (9, 5, p. 781) Technical Note

B93-112 Erosive Burning of Solid Propellants. Merrill K. King, *Falls Church, Virginia*, (9, 6, p. 785) Survey Paper

B93-113 Erosive Burning in Solid Propellant Motors. J. C. Godon, J. Duterque, and G. Lengellé, *Office National d'Etudes et de Recherches Aérospatiales, France* (9, 6, p. 806) Article based on AIAA Paper 91-1865

B93-114 Numerical Studies of Solid Propellant Erosive Burning. Victor K. Bulgakov and Alexander I. Karpov, *Khabarovsk State University of Technology, Russia*; and Alexei M. Lipanov, *Institute of Applied Mechanics, Russia* (9, 6, p. 812) Article

B93-115 Hydraulic and Mechanical Performance of LE-7 Lox Pump Inducer. Kenjiro Kamijo, Makoto Yoshida, and Yoshinobu Tsujimoto, *National Space Laboratory, Japan* (9, 6, p. 819) Article based on AIAA Paper 92-3133

B93-116 Full Navier-Stokes Analysis of an Axisymmetric Scramjet Inlet. Yeu-Chuan Hsia, *Rockwell International Corporation* (9, 6, p. 827) Article based on AIAA Paper 92-3100

B93-117 Computational Analysis of Vented Supersonic Exhaust Nozzles Using a Multiblock/Multizone Strategy. John R. Carlson, *NASA Langley Research Center*; and S. Paul Pao and Khaled S. Abdol-Hamid, *Analytical Services and Materials, Inc.* (9, 6, p. 834) Article based on AIAA Paper 91-0125

B93-118 CFD-Based Three-Dimensional Turbofan Exhaust Nozzle Analysis System. Brian D. Keith, K. Uenishi, and D. A. Dietrich, *General Electric Aircraft Engines* (9, 6, p. 840) Article based on AIAA Paper 91-2478

B93-119 Airfoil Wake and Linear Theory Gust Response Including Sub- and Superresonant Flow Conditions. Gregory H. Henderson and Sanford Fleeter, *Purdue University* (9, 6, p. 847) Article based on AIAA Paper 92-3074

B93-120 Wind-Tunnel Evaluation of Mid-Airframe Installed Turbojet Engines. J. S. Lilley, *U.S. Army Missile Command*; and S. L. Pengelly, *Boeing Defense and Space Group* (9, 6, p. 858) Article based on AIAA Paper 92-3752

B93-121 Conceptional Study of Separated Core Ultrahigh Bypass Engine. Y. Saito, N. Sugiyam, M. Endoh, and Y. Matsuda, *National Aerospace Laboratory, Japan* (9, 6, p. 867) Article based on AIAA Paper 92-3775

B93-122 Constrictor Flow Analysis of a Medium Power Hydrogen Arcjet. B. Glocker and M. Auweter-Kurtz, *Institut für Raumfahrtsysteme,Universität Stuttgart, Germany* (**9**, 6, p. 874) Article

B93-123 Cathode Phenomena in Plasma Thrusters. Monika Auweter-Kurtz, Bernd Glocker, Helmut L. Kurtz, Otto Loesener, Herbert O. Schrade, Nikolaos Tubanos, Thomas Wegmann, and Dieter Willer, *Universität Stuttgart, Germany*; and James E. Polk, *Princeton University* (**9**, 6, p. 882) Article based on AIAA Paper 90-2662

B93-124 Investigation of Secondary Flows in Magnetohydrodynamic Channels. R. C. Goforth and C. H. Kruger, *Stanford University* (**9**, 6, p. 889) Article
